

# Instructions

Broken Key Extractor Set

No. EZ-6

## INSTRUCTIONS

1. An assortment of both saw and spiral type blades are enclosed inside the handle.
2. Remove plastic cap, select blade, open collet and insert blade.
3. Tighten spiral blade with about 1 3/8" exposed.
4. For maximum grip on spiral type blade, pull against sharp edge as shown.
5. For maximum grip on saw type blade, push the blade all the way into opened collet, with the blade positioned at the bottom. Tighten firmly.

6. Always close collet when finished, so that blades will not be lost. Replace plastic cap.
